

SAK and Associates is the Pacific Northwest's premier concrete subcontractor. Focusing its work in Washington, Oregon, and Hawaii, SAK provides expertise in all aspects of the concrete construction industry, including Tilt-Up, Structural Cast-In-Place, Architectural/Site, and Sack and Patch / Repair. SAK staff has ability to provide detailed conceptual budgeting along with structural design-assist / design-build services. SAK'S attention to detail, schedule, and quality has created an exceptional reputation among general contractors and developers.

Tilt-Up

Novelty Hill Januik Winery

SAK performed all concrete on this project in Woodinville, WA that won awards for best tilt-up construction. The project included insulated panels in the winery along with decorative panels in the courtyard / plaza.

Christ Church Project

Christ Church was a remodel of a manufacturing building. It is a steel fabricated building, and the tilt up panels are architectural panels used to make the building into a unique project for both the client and SAK.

Macy's Redmond Town Center

Pacific Coast Corporate Park
